

New SCQF Credit Points filter within Breadth and Depth

With the February 2024 Update, a new filter has been added to the **Breadth and Depth** measures, both **Leavers** and **All Candidates**, to allow filtering of the measure by **SCQF Credit points**.

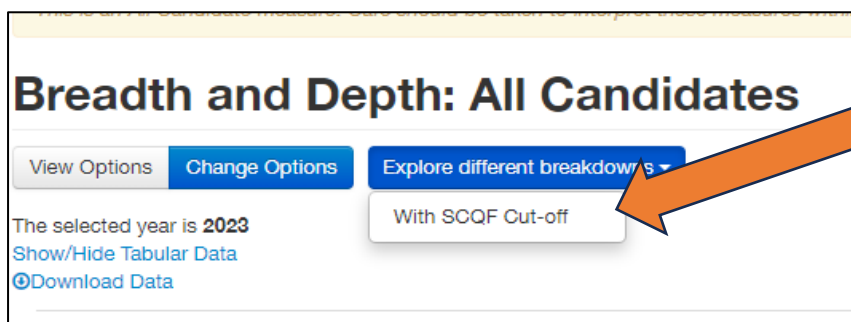

This filter will allow analysis of how courses of different durations impact upon the measure. A reminder that **one SCQF Credit Point represents a notional 10 hours of learning**.

1 Turning on the filter

Select either **Breadth and Depth: Leavers** or **Breadth and Depth: All Candidates** from the **Course** menu. For this guide the latter was selected.

Click on "**Explore different breakdowns**" and select "**With SCQF Cut-off**"

The title of the page will now read "**Breadth and Depth with Cut-off: All Candidates**" indicating the "**SCQF Credit Points Cut-Off**" filter is now available.

2 Using the filter

Select “**Change Options**”

This is an All Candidate measure. Care should be taken to interpret these measures within the context of local curriculum models.

Breadth and Depth with Cut-off: All Candidates

Click on “**SCQF Credit Points Cut-Off**” filter to show the course durations that can be displayed.

A reminder that **one SCQF Credit Point represents a notional 10 hours of learning**. So if, for example, you select the 3+ filter then only courses of at least 3 SCQF credits (notionally 30 hours) will be included within the Breadth and Depth table.

Once a Cut-Off is selected, click **Update** to view updated data. Analysis of how courses of different durations impacted upon the measure can now be conducted.
